

# Virtual (software) Terminal: ST (Terminal simulation)

**Terminal simulation software running on Windows computers on counters providing new queue no call function via PC keyboard.**

- ➡ Regular call or priority call in queue.
- ➡ Calling any special number instantly.
- ➡ Monitoring all waiting people in all services.
- ➡ Monitoring current states of other counters.
- ➡ Sleep (rest) mode is attainable at any stage.
- ➡ "No show" attribute (No response in a preset time).
- ➡ Recalling any number if parked for a repetitive call.
- ➡ Transferring to any other service or counter.
- ➡ Assigning new "Queue No" for later operations.
- ➡ Chatting between counters is possible.
